

Nassau County Fire Rescue

March 2021

Nassau County Public Training Facility. On March 22, 2021 a groundbreaking ceremony

Public Training Facility Site Plan

was held for the Nassau County Public Training Facility.

This will be a joint training facility for both NCSO and NCFR. The Fire Rescue portion will include a training tower, drafting area for water supply training, and other training props. Also included in the project will be classroom space for holding lectures and training sessions. We are happy to be included in this project with the Sheriff's Office and look forward to seeing this project come to fruition

Fire Station 71 is almost ready. There are several things going on there at the same time and almost all trades are in there working. The cabinets are being installed, the asphalt has been poured, and the electricity has been turned on. The list goes on, but we are excited about nearing completion and getting this new station in service for our citizens soon.

MOTEL FIRE: On March 30, 2021 crews from several stations responded to a fire in an abandoned motel on the northwest corner of I95 and US17. There was fire in two rooms on the downstairs of the building. Battalion Chief Chris Gamble and crews from station 30 and 70 forced entry into the building and extinguished the fire.

Smoke is visible upon arrival at the motel

Crews from Station 30 and 70 extinguishing the fire inside the abandoned motel
