The new year often means setting new goals or wanting to make changes. A key point to achieving change is being motivated for change. Once you have that and are prepared to put in work, the next step is setting SMART Goals. Setting goals gives you focus and direction, including an action plan to guide you. When goals are SMART, they contain all the key elements to help you be more successful.

SPECIFIC: Set a clear and well-defined goal.

MEASURABLE: Include precise amounts with numerical value if possible. I will lose 5 lbs per month. I will exercise 30 minutes per day. This allows you to measure your progress and mark successes.

ATTAINABLE: Make sure your goals are realistic. You want them to be a challenge but also achievable.

RELEVANT: Your goal should be relevant to the change you want to make.

TIME-BOUND: Include a deadline! The sense of urgency helps push you closer towards your goal.
